ENCON[®]

ENCON[®] started in 1992, has come a long way from doing domes, skylights, atriums etc. in fiberglass & polycarbonate to tensile membrane structures . We are quick to adapt global influences & translate the same into our products & projects.

We have a policy of continuously improving our quality management systems.

We are pioneers in tensile covering in North India.

We have the best and most experienced manpower in this industry in North India.

Around 20 years back we had done a Open Air Theatre around 22000 sq ft the biggest at that time in North India.

In 2016 we have completed one of the biggest coverings in North India around 2,00,000 sq ft Atrium for Omaxe Connaught Place Mall, Greater Noida.

We are working with some of the best names in the construction industry like DLF,UNITECH,DIAL,OMAXE,MAHAGUN,EMAAR MGF,VATIKA,SUPERTECH,BESTECH,ASHIANA, ANSALS,ASCOT to name a few

We are working with some of the best architects like Hafeez Contractor, Sikka Associates, Spazio, Design Plus to name a few.

ENCON is the source for quality products. Our designs are the industry standard for innovative engineering.

We have in house M.S. & Aluminium fabrication .

We also have in house spray painting facility for M.S. framework.

We also have state of the art fabric welding facility.

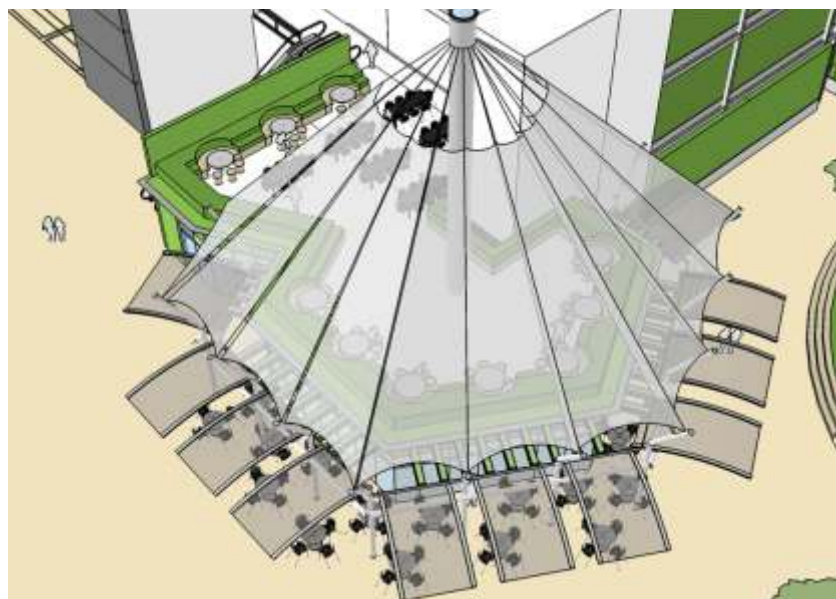

We have a comprehensive range of imported tensile and other outdoor membranes in stock.

We have on our panel qualified structural designers who have experience in various International projects and work on some of the best softwares in this industry.

We have two production units

*Pace City II ,Gurgaon

*Chopanki, Bhiwadi

For us at ENCON, means of achieving growth are just as important as growth. We strive towards client, employee & supplier satisfaction in our business dealings.

Atrium/Public places

Tensile membrane is the favoured covering material for atrium coverings in mall and commercial buildings. The membrane allows just the right amount of natural light and also eliminates the glare. It also helps in reducing the air conditioning cost, being flexible, design options are many.

Tensile membrane structures are quite different from other building materials. The principal of construction requires a deep understanding of the fabric reaction to forces.

Steps of tensile structure erection

- * Concept
- * Structural analysis
- * Detailing, Shop drawing & Connection details.
- * Patterning of membrane
- * Fabrication and painting of the structure
- * Installation and tensioning
- * Maintenance & cleaning education to end user.

Sports Covering:

Tensile membrane is the best material for covering of basketball courts, badminton courts, swimming pool covering, TT rooms etc. The covering provides a good waterproof and shaded area. The areas can be air conditioned also.

Sports Shade Structures are designed to protect players or children on many different types of outdoor athletic courts, sport fields, play areas and schools. Depending on your requirements, our sports courts shade designs can cover entire basketball courts, skateboard parks, tennis courts, badminton courts, roller skating rinks, volleyball courts, and other play areas for sporting events, as well as school PE areas.

We can give you shading only option as well as waterproof covering options.

These structures can be structurally designed as per relevant codes for complete safety and stability

Textile/ Membrane/ Architectural Facade:

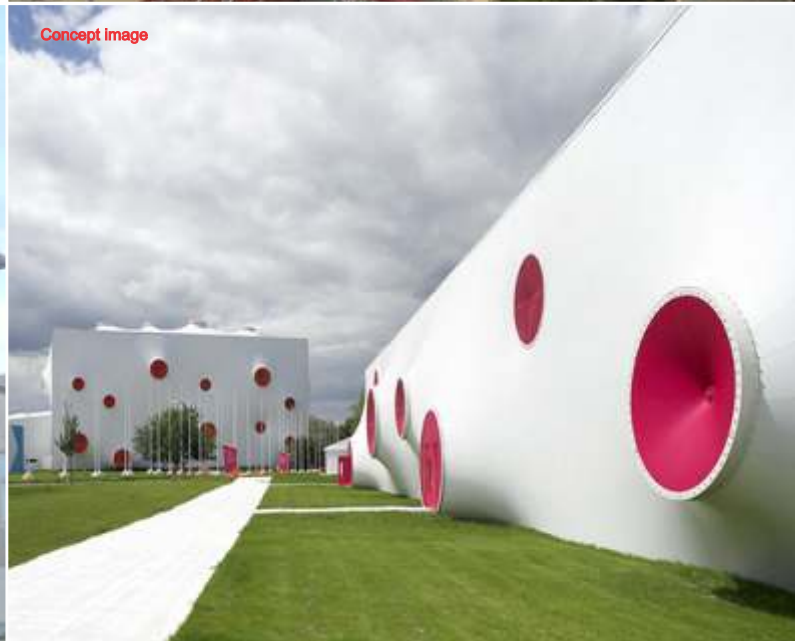

It is the latest in building facade. It can provide shading, at the same time create iconic elevations. It also increases the building insulation vis-a-vis other elevation materials like glass etc. Burj Al Arab at Dubai is popular example of fabric being used in elevations. ENCON can give shape to interesting forms , colors and textures.

Skylight Shading System:

Skylights though essential for sunlight sometimes do add to heat and glare. With skylight shading system the amount of sunlight coming in the building can be calibrated to our comfort level. It allows you the option of having sunlight in winter and diffusing the glare in summer. It will reduce your energy bills. The shading system can be motorized or manual. They can be inclined or horizontal.

Retractable Roof:

Retractable roof allows you to come closer to nature.

Roof can be opened or slid back, to allow fresh air, to enjoy the sun or moonlit sky.

Roof can be closed during extreme weather conditions.

The Retractable roof system can be motorized or manual.

They can be inclined or horizontal.

PREFAB LIGHT WEIGHT ROOM/ CONTAINER, OFFICE & RESIDENCE

ENCON is the most innovative manufacturer of prefabricated shelters/ rooms. We design and manufacture special prefabricated to ready made prefabricated Shelters/Rooms. We offer unmatched quality range of prefabricated Shelters/ coverings made from premium quality FR materials. We are engaged in commissioning, consultancy and designing of our prefabricated Shelters/Rooms

Buy a pre-fabricated house/ Office / Multipurpose and get it assembled on your site

- Fast & cheaper than conventional construction.
- Insulated, comfortable in adverse weather.
- Fascia design options.
- Relocation & Expansion possible.
- All weather material used.
- Fungus & Termite proof.
- No need of painting
- Light weight

PREFAB LIGHT WEIGHT ROOM/ CONTAINER, OFFICE & RESIDENCE

Applications:

- Residential floors, House Extensions
- Restaurant, Pubs
- Project office sites
- Slum rehabilitation
- Police / military / paramilitary camps
- Coverings where permanent construction is not allowed
- Education / healthcare

MESH SHADING APPLICATION

Mesh Shade cloth keeps the area shaded and is breathable. Excellent level of UV block and shade factor. Designed to breathe, it allows breeze to flow through, significantly reducing temperatures beneath. The colors remain vivid for years. Economical visa-vis other tensile membranes. Range of colors to compliment architectural trends. Provides ideal shade solutions for school playgrounds, child-care centre, sporting facilities, car park and other commercial locations.

Shade structures have become an integral part of open areas in Educational institutions for covering playground, recreational areas, swimming pools, vehicle drop areas etc.

MESH SHADING APPLICATION

PLAYGROUNDS

Protection from harmful UV Rays:

The skin of children is extremely sensitive, and research has also shown that high exposure to UV Rays is one of the major causes of skin cancer. In some countries like Australia & the GCC countries, it is mandatory to have shading over children playgrounds to protect the young children from the exposure to high UV rays. In India too all the progressive schools have started to use this solution to protect the health of their students.

Better usage of Schools playground and other open area:

During certain periods of the year, the temperatures are too high, for children to be comfortably playing in the outdoors. Providing shade cover to the playgrounds will increase the usability of the play areas.

Even during lunch breaks, the open areas can be used by the children, for dining etc., if they are shaded. Thus optimum utilization of scarce land resources can be assured by shading these areas.

MESH SHADING APPLICATION

CAR & BUS PARKING AREA

Better comfort:

When the outside temperature is above 36° celsius, and cars/buses are parked in the open, the temperature inside a parked vehicle reaches 50° to 60° Celsius, thus making it feel like an oven, when entering the car/bus on a hot day. Shades over the parking area, ensure a highly comfortable atmosphere inside the car/bus, even on hot days.

Reduced maintenance and better interiors:

In some parts of India the temperatures soar as high as 48° celsius outside. The high temperatures and exposure to UV has highly deteriorating effect on the interiors of the car/bus, like seats, dashboard, rubber trims, etc., resulting in high maintenance costs. Shaded parking area reduce this deterioration, and keeps the interiors better looking for a longer period of time.

MESH SHADING APPLICATION

SWIMMING POOL AREA:

Protection from harmful UV Rays:

Most people must have experienced how the skin gets tanned when you go for swimming regularly. This is again due to high UV exposure, which is not good for the health of the skin of young children. During swimming a large part of the body is exposed to UV rays. Shading of the Swimming Pool reduces this harmful exposure substantially, and also makes the swimming experience much more enjoyable due to a comfortable shaded atmosphere.

Water conservation:

Shading of the Swimming Pool also reduces the loss of water due to evaporation under the heat, thus reducing the usage of water.

MESH SHADING APPLICATION

FEATURES & BENEFITS

*Knitted lock-stitch construction for fray and tear resistance, offers more air movement and better channeling of cool breezes

*UV-stabilised HDPE monofilament and tape yarn provides optimal balance between strength and UV block, with easy fabrication and minimal maintenance

*Strong HDPE won't rot or absorb moisture

*Stentered (heat set) virtually eliminates any possibility of shrinking once installed and provides ease of fabrication

*UV Block range 89.3%-97.7% reduces sun exposure for safe and extended time outdoors

*10-year UV degradation warranty on fabric

*100% lead and phthalate free for a healthier environment

*Greenguard® and Oeko-Tex® certified provides confidence in operational quality assurance

*Engineered in Australia for the harshest conditions

*100% recyclable

ROLLER BLIND

ENCON'S blinds come in a variety of Screens, Translucent and blackout options. In ENCON Roller blinds, the fabric is inserted in specially designed grooved roller tubes for proper installation of fabrics and uniform lifting. Available in wide range of fabrics form USA, Germany, France and across the globe. Our unique automation controls allow multiple blinds to maintain the same level when being raised or lowered.

The advantages of Roller Blinds

- * Simple and easy to use
- * Low maintenance
- * Light weight
- * Easy to install
- * Big collection of fabrics
- * Reduces glare
- * More affordable in comparison to several other blinds
- * Easy to operate- manually or remote
- * Resistance to adverse climatic condition

French Victorian Conservatory

The incredible Victorian conservatory is a true classic which has been inspired from the late Victorian architecture.

The classic style will capture the eye of any beholder.

Victorian conservatories can be adapted to suit any style of home / restaurant.

Whether you are looking for a outdoor lounge or outdoor dining space this conservatory style will add significant value to your property.

Encon offers customers a chance to choose the type of finish applied to the conservatory for that added splash of color.

All the best of the Victorian era is brought to life in this conservatory style, the highlight being the vast panoramic views, perfect for admiring ones outdoor all year around.

French Victorian Conservatory

French Victorian Conservatory

French Victorian Conservatory

French Victorian Conservatory

You have always wanted to bring in a bit of the outdoors and now is the time to consider adding a sun room, conservatory or enclosing a little used sun porch for year-round enjoyment. Consider the space gained by converting an open porch into a 4-seasons sunroom. Imagine morning coffee in your own sun room or the dramatic transformation of your home into your castle with the addition of a conservatory.
